

Certification

The Company hereby declares that the Company's products that are delivered to customer do not contain Cd、Pb、Hg、Cr6+、PBBs and PBDEs. Except the Chip Resistors、Metal Glaze Film Fixed Resistors and Network Resistors contain lead, it is meeting RoHS.(DIRECTIVE 2011/534/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 10 September 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment)Because some materials used in the resistors' body (e.g. R-U paste) haven't lead free material to replace in the present industry. And because these leady materials are glass materials, they have be excepted by the RoHS (2011/534/EU).

Resistor products of the corresponding instruction in the exemption clause as follows:

7 (c) - I In addition to ceramic dielectric capacitors, ceramic or glass of lead in electrical and electronic components, such as piezoelectric ceramic devices, glass or ceramic composite material.
