See ILL. 1 for detailed nomenclature and ILL. 2 for air gap details.
Note: The switch type code of the model name may follow by the extra letters, see ILL. 1 for detail information.

## EXPLANATION OF COLUMN HEADINGS:

Model - Cat. No. - Identifier used by the manufacturer for a specific switch Model or Catalog number.
f/b - followed by.
ww/o - With or without.
Load - identify the load according the Testing. R= resistive, RM= resistive and motor, RC= resistive and capacitive, L=tungsten lamp load, Spc= specific load, $m A=l o a d$ below $20 \mathrm{~mA}, \mathrm{SpcL}, \mathrm{SpcT}=$ specific lamp load such as US L or $T$, I= inductive, SpcM= specific motor rating, Rhp= resistive and horse power, $\mathrm{TV}=$ television, $\mathrm{GP}=$ general purpose, $\mathrm{GPM}=$ general purpose and motor, GPhp= general purpose and horse power.
Amps - the steady state amp value of the switch. Per pole value is verified by the circuit connection.
Volt - the Voltage (RMS) value.
Hz - the Frequency or range such as (50-60).
Temp - The declared operating temperature of the switch.
Pol/Thr/Cir - The number of Poles (Pol) and Throws (Thr) represented by the switch construction (where "M" indicates multiple poles (more than 2). The circuit (Cir) is identified by a code explained in the standard and appendix pages (Table 2 of 61058-1).
DIS - Disconnect air gap across open contact, electronic is indicated by "e", micro indicated "micro", FULL indicated with a measurement in mm.
30C cycle - the number of Endurance cycles completed with a temperature rise less than 30C (on terminals).
55 C cycle - the number of Endurance cycles completed with a temperature rise less than 55C (on terminals).
SPCA - Identifies Special Conditions of Acceptability that must be considered in the end product. A list of typical SPCOAs (represented with a number) are found in the WOYR2 guide card. Conditions other than the typical are represented with a letter and described in the specific volume and section follow-up procedure description.
ed - The switch evaluation was completed to the specified harmonized IEC standard (such as 3.1).
