The name of Titan's newly launched CPU cooler, Fenrir, is derived from the giant wolf of Norse mythology.

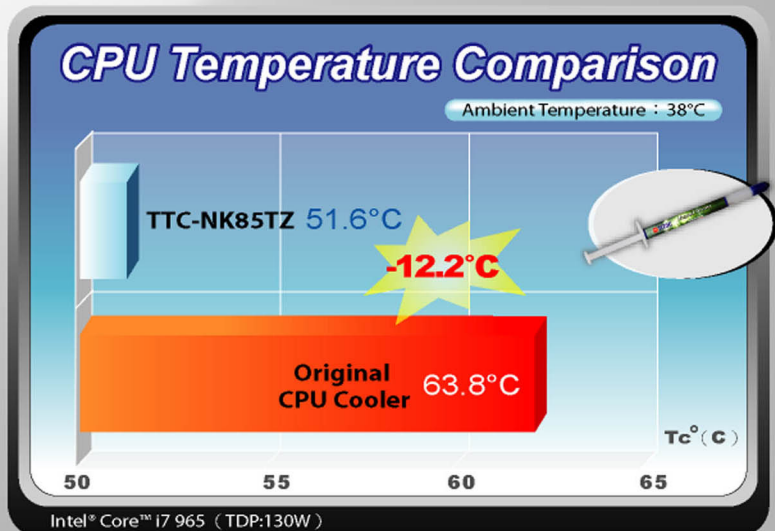

Fenrir-TTC-NK85TZ has many rich characteristics; comparing with the heat pipe size at 6mm, Fenrir possesses 4 larger 8 mm diameter copper heat pipes with the direct touch design to maximize the overclocking performance up to 160W and succeed in offering the best cooling performance. To perfect the heat conductive efficiency, the free sample of Royal Grease (0.032°C/W) is attached to each package. The 12cm giant fan with built-in PWM speed control technology will operate automatically to solve overheating problems and provide a silent environment.

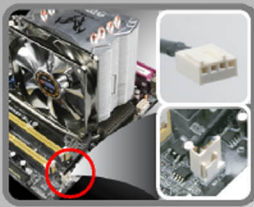

Fenrir, especially suitable for Intel LGA1366 is absolutely the best thermal solution for your computer.
