## HOW TO ORDER CUSTOM DRAWING

$$
\text { AA-01 + DRAWING NUMBER (Max. } 16 \text { digits) }
$$

This way of ordering should be used for options which are not included in the "How to order" standard and optional extras.

## FEATURES

Piher's AA series offers a wide range of Variable Attenuators available in five different industry standard dust proof packages: AA-01, AA-02, AA-03, AA-04 and AA-05. Designed for use in VHF/UHF applications such as CATV network/distribution amplifiers, above all, this attenuator series has been built to offer flexibility at a competitive price with the advantage of being a "One design-Multiple use" product allowing its incorporation in to different circuits without the need of modification, unlike digital alternatives which are dependent on circuit supply voltage and power dissipation demands for their design.
